

# 6xHis-Ube2I

Cat. # C2500, C2501

<b>Also Known as:</b>	P18; UBC9; C358B7.1
<b>NCBI Reference:</b>	NM_003345
<b>MW (no tag):</b>	18 kDa
<b>Species:</b>	Human
<b>Source:</b>	Bacterial recombinant
<b>Tag:</b>	6xHis
<b>Stock Buffer:</b>	20 mM Tris, 150 mM NaCl, 2 mM βME, 10% Glycerol
<b>Concentration:</b>	See tube label
<b>Quality Assurance:</b>	~95% by SDS-PAGE

**Image**

<b>Description:</b>	Ube2I (Ubc9) is an E2 enzyme in the E1, E2, and E3 cascade to link SUMO to a substrate. This E2 shares a similar sequence and structure to the Ub E2s and is the only known SUMO conjugating enzyme at this time. Ube2I shares 56% amino acid identity with the yeast homolog called Ub – conjugating enzyme 9. While a hypothesis has been proposed that Ube2I may not need an E3 to ligate SUMO.
<b>Storage:</b>	Store at -80°C; avoid multiple freeze-thaw cycles
<b>Note:</b>	N/A
