

6xHis-Ubiquitin (I44A)

Cat. # E1910

Also Known as: 6xHis-Ub (I44A)
NCBI Reference: N/A
MW (no tag): 8.5 kDa
Species: Human
Source: Bacterial recombinant
Tag: 6xHis
Stock Buffer: 20 mM Tris, 150 mM NaCl, 2 mM β ME, 10% Glycerol
Concentration: See tube label
Quality Assurance: >95% by SDS-PAGE

Description: Ubiquitin (Ub) is a 76 amino acid protein widely expressed in the cytoplasmic and nucleus of cells. Ub is posttranslationally conjugated to proteins by the E1, E2, E3 protein ubiquitination cascade. Ub can be conjugated on proteins as monoUb or polyUb chains. Protein ubiquitination plays both proteolytic and nonproteolytic functions. Usually, polyubiquitinated proteins are targeted to the 26S proteasome for proteolysis. Typical concentration to support in vitro ubiquitination is 50-100 μ M. I44 is one of the key residues of the hydrophobic patch on Ub surface.

The I44A mutant inhibits the interactions of Ub with many Ub-binding domains.

Storage: Store at -80°C; avoid multiple freeze-thaw cycles
Note: N/A
