Biotin-TRAIL

Cat. # U1110

Also Known as:	TNFSF10; TL2; APO2L; CD253; Apo-2L		
NCBI Reference:	NM_003810.3		
MW (no tag):	23.5 kDa		
Species:	Human		
Source:	Bacterial recombinant		
Tag:	Biotin		
Stock Buffer:	20 mM HEPES, pH 7.8, 150 mM NaCl, 2 mM βME , 10% Glycerol		
Concentration:	See tube label		
Quality Assurance:	~90% by SDS-PAGE

Description:TRAIL (TNF-related apoptosis-inducing ligand) is a cytokine that is produced and secreted by
most normal tissue cells. TRAIL binds to cell surface death receptors DR4 and DR5, by which it
activates caspase-8 to induce apoptosis of cancer cells but not of normal cells. This product is
made by reacting His6-TRAIL (containing aa 95-281, catalog # U1100) with sulfo-NHS-LC-biotin
with a space arm of 22.4 angstrom. It can be used for pulling down TRAIL-interacting proteins
by using streptavidin resin.Storage:Store at -80°C; avoid multiple freeze-thaw cycles
